

## Exam Time @ Newgen's Digital Discovery Paathshala

After successfully concluding sessions on Diversity for 6th graders as a part of 'Month of Digital Literacy', Newgen's CSR team felt a need to evaluate the understanding level of the young minds. The team decided to conduct multiple choice questions based test on the topic of Diversity.

To help the children recall better, revision classes were conducted on various aspects of Diversity. The MCQs (multiple choice questions) were often preceded by audio-video sessions and power-point presentations. Dance form of Kerala, Animals found in Rajathan, Modes of Urban & Rural transport, are among the many questions the children were required to answer.

It gives us immense joy to state how well the students of Section A, B, and C performed; 5% secured full marks, 15% achieved above seventy percent, and 60% scored more than sixty percent. However, the performance of students of Sections D, E, and F has not been up-to-the-mark and retests are being conducted.

It has been rightfully noted that regular audio-visual sessions create a lasting impact on the young minds. The sessions have not only helped make Social Studies an interesting subject but has also enabled the students to absorb and retain the knowledge better.
